### DETAILED ACTION

1. This is in response to applicant's amendment to after final filed 10/27/04 in which claims 1-9 are withdrawn and 10-11 are pending.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

Claims 1 through 9 are canceled.

4. After further search and thorough examination of the present application and in view of applicant's amendment, Claims 10-11 are found to be in condition for allowance.

5. The following is an examiner's statement of reasons for allowance: the prior art Ladner et al "Ladner" (5,594,425) in view of Boling et al "Boling" (6,226,510). Ladner discloses a personal safety signaling apparatus (figure 1 and #12) comprising: a first communication means (communication between portable and base station 16 of figure 1), the first communication means for transmitting an emergency radio signal (column 2, lines 63-67 and figure 1). Ladner discloses an activation means (items 58 and 62 for figure 4) for initiation said first wireless communication means (column 7, lines 35-42). Ladner discloses a first wireless link (figure 1) for receiving said emergency radio signal, (column 3, lines 1-11) the first wireless link capable of communicating the presence of emergency radio signal to a central monitoring station via a second wireless link (link

between base station tower 16 and data processor station 18) (column 3, lines 4-11). Ladner discloses the central monitoring station (18) capable of determining the location of the first wireless link (12) via triangulation of the emergency radio signal, (column 1, lines 34-50 and column 3, lines 28-45) and the central monitoring station (18) further capable of alerting an emergency response vehicle via another conventional alert method (responder 20) (column 3, lines 45-65 and figure 1). Ladner teaches the personal safety signaling apparatus (12) (column 7, lines 13-28).

On the other hand, the present application specifically discloses a wrist watch having ridged said activation means extending linearly above a watch face in parallel alignment therewith and having curved ridge ends defining opposed upper corners of said watch face; and a pull-clip placed on a side of said watch, said pull-clip pulled to trigger transmission of a remote signal. These limitations, in conjunction with all other limitations, have not been disclosed, taught or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
